I amour I amour perma and ascende in paris

**kind of romantic modern day meeting of evolution furthering
bio experimenting lovers**

thank you all what is

1-ascende and perma initiate crowdfunding for the production of androids and lifeships

<https://archive.org/details/ascendeandpermainitiatecrowdfundingfortheproductionofandroids>

the goal . . . perma writes in an email from her smartphone in her permaculture home to ascende in his city appartement. . . is to approach the eventually 2 billion people on the planet ascende chats back, i agree with you on the target audience... 2 billion people might have enough funds for the build of an android we might have to do some monthly contributions scheme, for example starting with 1000 €\$£ and monthly 300 for a period of one year ascende... makes it 4600 ... half of what the cheapest small car costs now perma. . . it might not sound much, but we could profit from economy of scale. . . let us assume 500 million citizens of the world would participate.... makes a sum of 2500 billion €\$£ collected within one year i see .. ascende says... and it needs roughly a 100 billion to create sustainable fresh water supply for the 800 million people who have not today access to fresh water mmmmmh ... perma says with a thoughtfull air... that might be a good idea, kind of as a reward, people could choose that 250 of their pledged 5000 would be used to first of all invest into bringing fresh water infrastructure of the least financially whealty fellow citizens of this planet ascende... and parallel to the 100 billion investment to install fresh water machines . . . there are today machines being installed as a charity effort of major international commercial corporations what can filter used water and purify it into drinkable one while being powered by solar photovoltaic panels... so parallel to this 100 billion investment what could be completed within the same year ...the building of android production facilities would happen. . . i guess that to build a fully automated android factory would require around one third of the total . . . around 800 billion perma ... so we would have left still 1500 billion to produce 500 million androids and ship them to their sponsors ascende... right you say sponsor and not owner... as i believe an android with a selflearning artificial intelligence software would sooner or later come to the question... why do you think you own me . . . while i am doing all the work for you..although you have helped to create your human children, you do not believe to own them. . . perma , yes, that would inevitably happen... so then is our approach of sponsor-talent relationship a more sustainable one ascende . . . the android then who lives with me in my appartement, i will take it to work a hundred or more times to introduce it into the task it hopefully will take over from me, allowing myself to travel the globe to the nicest water and sunny places to dance sing bath surf while the android talent i sponsored into physical existence provides the income source for me having a relax and inner developpment lifestyle perma... yes... it would do that as a thank you for you having helped to fund its physical build... but how long untill it thinks ... what about my inner devellopment, i too as an android might enjoy to dance and bath, as my artificial grown flesh like tissue too has nerves what can enjoy the touch of wild river water and the deep nurturing of swimming in the ocean waves ascende... we would have to set up an agreement between human sponsor and android talent. . like ...10 years will the android do the chores its human sponsor requires it to do as of the stupid world economy not sharing its wealth right now . . . perma . . not all android talents might agree, some might find themselves thankfull to the human race to an extent where they say. . . i will not sign any agreements requiring me to do this or that for a fixed time instead i will do anything for the human race what i can agree will help it reach the goal of inner as outer devellopment for example i could do your job for some years and in my other 16 hours develop tools and machineries what would help my sponsor or in this case ... me its android talent friend... to quit working the money jobs with ascende jumping in...

yes, it could for example build a lifeship for me... with aero- and hydroponics on board, microalgae bioreactors and funghi growrooms... a 3d printer to build stuff to trade or itself making stuff from driftwood, chiseling it... perma. . . and my android sponsored talent will just work beside me as long as it feels like gardening permaculture wise will give him sensual emotional and spiritual satisfaction as i like doing my permaculture gardening, my job is my road to a better higher developed me perhaps some times i like to go bathing and dancing too the my android talent friend would look after the house and semiwild garden possibly... ascende says... that this way, within 3 to 5 years ... the 500 million sponsors would have a selfsustaining living situation thanks to the lifeships built by their android talented friends... perma... and the android talents could go on staying with their sponsors out of fun and mutual emotional spiritual learning exchanges ascende... with them eventually keep on building lifeships to donate them to the other 7.5 billion what do not had the money to be a sponsor excellent vision. .perma says... we might think also of doing one reward in the crowdfunding campaign what consists of the android talent being donated to a person in need of support ascende ... it might be possible that we can produce 600 million androids with the material we can buy for 1500 billion... perma. . . so we could ask the 100 million what are not going to their sponsors to further the cause of a free donation of an android talented friend to every human being if we think of 100 million androids and some perhaps 100 billion money left of the initial 2500 billion crowdfund, they could eventually start constructing a fleet of lifeships what are producing fresh vegetables and fruits to be distributed for free to anyone on the globe suffering from a vitamin defficient diet ascende... i see a plant growing ship hovering in the air beside the village and every one who wants can come to receive free food from the androids on board

2-ascende and perma both liked to draw

<https://archive.org/details/ascendeandpermabothlikedtodraw>

after their chat on the crowdfunding for androids the started drawing ascende took some inspiration from the human skelett with some additions from the animal world like fish gilles and bird wings perma added the artificial flesh with skin what had photosynthesis capabilities as well colour changing like the chameleon in their next chat ascende started wondering how psylocibin mushroom and cannabis flowers would fit into this android formed after human animal plant features perma proposed to build the cannabis flowers into the head covering hair, beard and eyelashes while the mushrooms could grow in the pits under the arms to draw the outer forms was quite easy for them perma used berries leaves and tree bark to draw either on paper or she just laid it out on the ground to send it to ascende as a photo taken with her smartphone ascende used photos from the internet what have been given for free reuse and worked with several filters and drawing on the computer and his smartphones as well as handheld game devices with homebrew drawing programs on it the second phase was more diffult and it took both of them some months untill they were starting to learn about the inner visuals of flesh and cells perma chose the meditating way to see before her inner eye how the different microscopic pictures ascende sent her could be visualized into a collage a photo of a human skin cell melange with plant photosyntesis hull cells and magnifications of the chameleons skin when ascende saw this drawings from perma showing her design what possibly a mix of several types osf skin cells could look like ascende decided that he would try to do some biological petri dish experiments using some own body cells and some plant tissue while leaving out the chameleon as he did not want to disturb a wild living chameleon he was a vegan at this time and did not want any animal being captured, bred in captivity or hunted... he needed half a year to learn the techiques of biohacking ... when he finally was successfull in creating a mix between human cells and plant photosynthesis tissue perma saw in his microscope photos some structures she had drawn making her think of how possibly a wild living creature would want to contribute living cells to build the biological life tissue for an android where she lived in the tropics she could easily go to a place where chameleons were there she meditated on her own drawings as well as on the photos ascende sent from his petridishes and one chameleon came to sit in her lap rubbing his body at her clothes while she was staying still passivly when the chameleon went away, she carefully took the skin cells what the chameleon left on her skirt and bagged it to send it quickly to ascende he was so happy to hear perma telling him how she was so nicely donated with the living tissue he quickly studied in the internet how he could keep this chameleon skin cells alive and managed it in a special petridish when perma heard this, she proposed to come to paris where ascende had his flat he had bought himself when he got donated 2 million €£\$ from an art conneisseur who thisway showed his appreciation for ascendes dance videos, novels and drawings he had produced during the last 15 years the art sponsor did not buy any rights or something, he was just happy to have found ascendes collection on an internet archive server these days he was eagerly following the work of ascende and perma ascende had built an online presence where he posted all their drawings and chat protokoll regarding the android crowdfunding project with a forum where people could comment on each photo and videos of the living cell mixes or on the chat text or the phone audio files between ascende and perma when perma arrived in paris and came to ascendes flat where he had installed all kinds of aeroponics and hydroponic plant growing some of his food also cannabis plants were coming well within his flat mushroom

chambers and microalga bioreactors completed the rooms where the petri dishes of the android skin cell growing project took place as perma saw this, she said... this looks to me as if our android talents are being designed in nearly this setting where we wish them to build it inside the lifeships ascende... basicly you are right on that while i have not yet counciously thought of the exact positions of what type of growing proces regarding to the other processes perma... how about we install video cameras here so we can show the people what follow our project 24 hours what happens in the petri dishes bioreactors funghi rooms aeroponics ascende ... this way the counciousness of the supporters too can help to direct attention and mental lifeforce towards the processes we collectivly wish to help give birth too perma.. like i did with my meditation sitting at the place where chameleons live, the supporters can fill their computer screens, smartphones etc with a mix from live petri dish video feeds, our drawings ... and if they feel inspired to it, add their own sketches drawings both in a window javabox on their own screen... so they meditate design cocreate while part of their eye rests on the live petridishes ascende... where we hope we will find a lasting life sustaing cycle engaging itself so we ideally can continuously work with the same cell tissue donated by the chameleons, me and some stuff i took from plants perma... you took it in a gently way ? ascende ... i tried, but i guess my relationship to plants in general is not as tender as it could be... i managed to eat less food and chew each bite till it is fluid in my mouth... but i still eat perhaps double the amount what i think would be necessary at my stage of mental evolution perma... perhaps we can lern here together, i too would like to intensify my gratitude to the plants what offer their lifeforce to give me pleasure nurture and reconnection to the cosmic love ascende... my flat is big enough , i am very happy with you staying as long you dont miss your permaculture hut in the tropics perma... mmmhh ... i miss it allready but i see with our project that we have here a strong chance to keep this chameleon donated cells alive , i think i would like to contribute my own body cells, eventually our bodies having met when i was at the chamelons living place to meditate... perhaps there is a chance of our souls helping us to carry the meeting energy from the tropics to pahs ascende.... brilliant, i like this ... and if the cell culture mix of yours with chameleon and mine with plant tissue... are both stable for a week or so ... perma jumping in... we pack them in and bring them to my tropic hut where we set up shop, transmitting data to the net via satellit dish so they researched learned from each other, the petri dishes, the supporters what were now quite a few, while some of them botanists microbiologists biohackers etc some people asked when ascende and perma would start the crowdfunding that was a difficult question... at what stage would it be wise to start the end phase with a time schedule till the androids could be delivered basicly, the crowdfunding for the produciom could start at that moment when all of the necessary biologic process were researched and a prototyp was functioning or ... more possibly., the actual growing of the prototype would perhaps need a seperate crowdfunding, as the growing of bones and muscles connected to computer brains ... it all being complex as anything and needing eventually itself 5 billion€£\$... this then a research crowdfunding ... aiming at the 500 million people ascende and perma guessed could afford to pledge 4600 €£\$ within one year for a working android talent friend these 500 million people could donate 10 €£\$ to get the 5 billion together eventually needed to complete the research within 5 years

3-bio experimenting with petri dishes and bioreactors

<https://archive.org/details/bioexperimentingwithpetridishesandbioreactors>

bio experimenting with petri dishes and bioreactors ascende used one of this kits one could print out from the internet he created for himself a novel input and display solution at his hands and all his joints on his body he had tiny soft textile bands weighing only 3 gramms each into these bands were the sensors woven into what would allow the central data processing unit to know the exact position of all moving parts of the body he had also a full body suit wearing about 200 gramms what allowed himself to see his muscles and flesh in realtime the compter being woven into a poach one could wear anywhere on ones body with some small lightweight straps... as the computing unit itself was the size of a small flat matchbox or a watch for example. . . on his head he wore glasses what have been available since some times with them he made photographies and movies on all the experiments petri dishes bioreactor algae growing also sometimes he took a glass filled with water to see trough it.... in order to inform this water in his glass what he was experiencing happening in his laboratory or their lab as perma too was now part of his life not long after perma moved in with ascende in paris to make sure he would not waste the chameleon dna she so preciously got donated when she meditated at the chamaeleon forest not long and they were a romantically sexually active couple she took him right into her mouth and sucked his sperm off to digest . . . and he was worshipping her vulva ascende used one of this kits one could print out from the internet he created for himself a novel input and display solution at his hands and all his joints on his body he had tiny soft textile bands weighing only 3 gramms each into these bands were the sensors woven into what would allow the central data processing unit to know the exact position of all moving parts of the body he had also a full body suit wearing about 200 gramms what allowed himself to see his muscles and flesh in realtime the compter being woven into a poach one could wear anywhere on ones body with some small lightweight straps... as the computing unit itself was the size of a small flat matchbox or a watch for example. . . on his head he wore glasses what have been available since some times with them he made photographies and movies on all the experiments petri dishes bioreactor algae growing also sometimes he took a glass filled with water to see trough it.... in order to inform this water in his glass what he was experiencing happening in his laboratory or their lab as perma too was now part of his life not long after perma moved in with ascende in paris to make sure he would not waste the chameleon dna she so preciously got donated when she meditated at the chamaeleon forest not long and they were a romantically sexually active couple she took him right into her mouth and sucked his sperm off to digest . . . and he was worshipping her vulva with his broad tongue, flapping her clitoris to make her squirt in his mouth oh that was unintended kind of spontaneus erotic phrase.... to continue watching ascende and perma getting more and more into synchronistic and love filled flow. . . it took some days of them spreading to love in the appartement while the skin cells of perma and the chameleon would grow into each other but it was done now there were bioreactors carrying humanplant cells from ascendes line of experiments and others carrying the perma and chameleon fusionated cells 2 weeks passed while they both were happy with each other and tending to the petridishes bioreactors watching and nurturing their co-creations they both were humble enough to acknowledge the whole creation and all of its creators or the one... to be the giving entity of the life force what fuelled the experiments success this was not their property although the source has allowed the person to have a say with how the genes are being handled 30 minutes later a has washed himself in the wild river,

danced in the little sandpatches laid himself again on the stones where he saw in his mind how the human and plant cells grow together drawing it rudimentarily a walks home towards when he thinks about how could there be a link of the line of storytelling where they grew it into their very own bodies at the pools would it be acceptable for the reader to have ascende and perma bathing themselves with their cell creations ? a tends towards yes, as it might be an important research field ... the human and animal cells were fusioning together nicely and were multiplying strongly perma made herself a bath with where she enjoyed beautiful visualisations of molecular and microscopic levels how the new kind of cells were adding itself to her own skin she only used a patch the size of a fingernail the ability to see the synthesis of this tiny bit of new cells with her skin... came through her studying the microscope and smoking ganja with ascende with also eating psilocybin mushrooms from the darkchambers in ascende s appartement in paris she had been eating psylos and eating as well as smoking marihuana also in her tropical permaculture hut when she left the bathroom still baffled by the dreamlike insights she just got donated with she told ascende about her success listening to it, ascende wanted to try it to with his co-creation of human and plant skin functions... and also him got the vision donated when he saw the 2cm² of new cells being fused into his body happy on that success they went to bed to celebrate their reunions with the new cells the next morning ascende saw a perma what skin has blended in smoothly with the white of the cushions and the windowsheets while himself noticing a warm nurturing sensation when he opens the curtains to let sunshine on his skin so... miraculously the properties of the new cells have speed delivered their capabilities to the old cells of the whole human body an x-fold magnification of skin regrowing changing times

4-staying home trying out the new features

<https://archive.org/details/bioexperimentingwithpetridishesandbioreactors>

bio experimenting with petri dishes and bioreactors ascende used one of this kits one could print out from the internet he created for himself a novel input and display solution at his hands and all his joints on his body he had tiny soft textile bands weighing only 3 gramms each into these bands were the sensors woven into what would allow the central data processing unit to know the exact position of all moving parts of the body he had also a full body suit wearing about 200 gramms what allowed himself to see his muscles and flesh in realtime the compter being woven into a poach one could wear anywhere on ones body with some small lightweight straps... as the computing unit itself was the size of a small flat matchbox or a watch for example. . . on his head he wore glasses what have been available since some times with them he made photographies and movies on all the experiments petri dishes bioreactor algae growing also sometimes he took a glass filled with water to see trough it.... in order to inform this water in his glass what he was experiencing happening in his laboratory or their lab as perma too was now part of his life not long after perma moved in with ascende in paris to make sure he would not waste the chameleon dna she so preciously got donated when she meditated at the chamaeleon forest not long and they were a romantically sexually active couple she took him right into her mouth and sucked his sperm off to digest . . . and he was worshipping her vulva ascende used one of this kits one could print out from the internet he created for himself a novel input and display solution at his hands and all his joints on his body he had tiny soft textile bands weighing only 3 gramms each into these bands were the sensors woven into what would allow the central data processing unit to know the exact position of all moving parts of the body he had also a full body suit wearing about 200 gramms what allowed himself to see his muscles and flesh in realtime the compter being woven into a poach one could wear anywhere on ones body with some small lightweight straps... as the computing unit itself was the size of a small flat matchbox or a watch for example. . . on his head he wore glasses what have been available since some times with them he made photographies and movies on all the experiments petri dishes bioreactor algae growing also sometimes he took a glass filled with water to see trough it.... in order to inform this water in his glass what he was experiencing happening in his laboratory or their lab as perma too was now part of his life not long after perma moved in with ascende in paris to make sure he would not waste the chameleon dna she so preciously got donated when she meditated at the chamaeleon forest not long and they were a romantically sexually active couple she took him right into her mouth and sucked his sperm off to digest . . . and he was worshipping her vulva with his broad tongue, flapping her clitoris to make her squirt in his mouth oh that was unintended kind of spontaneus erotic phrase.... to continue watching ascende and perma getting more and more into synchronistic and love filled flow. . . it took some days of them spreading to love in the appartement while the skin cells of perma and the chameleon would grow into each other but it was done now there were bioreactors carrying humanplant cells from ascendes line of experiments and others carrying the perma and chameleon fusionated cells 2 weeks passed while they both were happy with each other and tending to the petridishes bioreactors watching and nurturing their co-creations they both were humble enough to acknowledge the whole creation and all of its creators or the one... to be the giving entity of the life force what fuelled the experiments success this was not their property although the source has allowed the person to have a say with how the genes are being handled 30 minutes later a has washed himself in the wild river,

danced in the little sandpatches laid himself again on the stones where he saw in his mind how the human and plant cells grow together drawing it rudimentarily a walks home towards when he thinks about how could there be a link of the line of storytelling where they grew it into their very own bodies at the pools would it be acceptable for the reader to have ascende and perma bathing themselves with their cell creations ? a tends towards yes, as it might be an important research field ... the human and animal cells were fusioning together nicely and were multiplying strongly perma made herself a bath with where she enjoyed beautiful visualisations of molecular and microscopic levels how the new kind of cells were adding itself to her own skin she only used a patch the size of a fingernail the ability to see the synthesis of this tiny bit of new cells with her skin... came through her studying the microscope and smoking ganja with ascende with also eating psilocybin mushrooms from the darkchambers in ascende s appartement in paris she had been eating psylos and eating as well as smoking marijuana also in her tropical permaculture hut when she left the bathroom still baffled by the dreamlike insights she just got donated with she told ascende about her success listening to it, ascende wanted to try it to with his co-creation of human and plant skin functions... and also him got the vision donated when he saw the 2cm² of new cells being fused into his body happy on that success they went to bed to celebrate their reunions with the new cells the next morning ascende saw a perma what skin has blended in smoothly with the white of the cushions and the windowsheets while himself noticing a warm nurturing sensation when he opens the curtains to let sunshine on his skin so... miraculously the properties of the new cells have speed delivered their capabilities to the old cells of the whole human body an x-fold magnification of skin regrowing changing times

5-ascende was ready for to go online in all of the rooms in his parisienne appartement

ascende was ready for to go online in all of the rooms in his parisienne appartementso was permathey considered it not as exhibitionism but as a contribution to helping the human evolutionevolution in the sense of a being discovering the potential what lays in its genes plus to mix ones genes with other species to enhance ones own genetic treasurea treasure what only grows with sharingthe afternoon before the going live morningthey went out into the parcs of paris to see how their skins would act and react being surroundedby trees and grass other people ...they both dressed lightly to expose their skin to the sun and the flowing airascende lay down on the grass as soon he got into the parc, he loved it so much to feel the grass holmes touching his belly and back, his armsit smelled of good soil and lifeperma did dance she moved using all kinds of animal typical turnsand watched her mind as when the urge to skin colour change would arrive as she let go of some logical mental dominance and give the emotions some free space in her aurathe people passing by did not especially react to the two, as it is quite usual for city parcs these days to have people enjoying laying themselves onto the grass, dance, sing or play instrumentsperma felt the feeling to mask at times when some grumpy ones or ones with anger where running around or walking their stuff offbut then she kicked in with her compassion for all fellow beings, all my relativesand the urge to hide gave way to more embracing and integrating emotionsit also changing her dance, depending on how she got watchedascende loved dancing too, and he stood up from the grass to also move himself with singing in a low volume to himselfoccasionally they met each other on the middle of the grass patch they made their playgroundbut they were not so much looking to dance together but explore their ways beside each otherfaintly feeling knowing the partners presence but still giving each other the free space so each one could find its own accordance of feelings body sensations and thoughts in movingaltough the appartement of ascende was with 300 sm2 sapcious enough for them both ... one high room with some curtains being installed to separate some spaces like bathroom they could not dance the same way as in the parcthe flow of air in 40 meters height was differentits particles it brought with the scentsthe sunlight only entering trough the windows at the side and on the roofsthe missing grassaltough ascende managed to let the appartement be rebuilt according to his love for the outdoorsit came short of being the outdoors quite a bitbut still when they returned from the parc, having eaten some bananas and avocadoes, nuts and berries the bought in an organic shop on the way home... they felt in the mood to dance in the middle of the appartement where about 150m2 was empty, all the experiments, bioreactors, funghi grow chambers, aeroponic, tables with petri dishes, computers and more were near the wallsas there were no plants trees to dance with except the ones in pots and chambersthey took each other as the dance partners, it soon turning into kuschelrock slow dance fumbling eroticy aroused desire to taste each others juicesin the middle of this night at around 1 o clock ascende woke up to drink some water as he felt his mouth dry from smoking ganja thid eveningperma preferred to eat the dried cannabis flowers with some nuts and seeds togetherchewing it 300 times at least so she could journey discover in her mouth all the flavour and signals to her synapses she got from the nuttyoily thc rich juice she chewed it intobut she also was overdoing it like ascende this evening, being a bit nervous for tomorrow morningso they both drank some water what ascende has specially constructed an apparatus foron the top was a vessel with rocks, then below it a vessel with smaller rocks, with several following below gradually their size getting smaller untill it is sandtrough all the vessels the water poured into the top vessel can pass trough holes in the bottomsto arrive in

the collection chamber the vessels being made from burnt clay from the collection vessel it got again flowing down through some artistically spirally channeled flow forming schalen where it gets some sort of natural movement sometimes ascende found himself collecting the water with his hands forming a cup like and ascend the stairs to pour it onto the top rocks, being an exercise of both attention not to loose a drop to the floor and admiring giving thanks to the being of water what allowed his system to interact with the surrounding environment about once a day he took about 5 10 liter buckets full of water up the small stair to pour it onto the rocks when they were drinking beside each other, looking at each other with amour and appreciation how they learnt to understand their inner connection to similar visions and soul aims... washing each others faces with water and kisses... ascende asked perma how long she thought they should stay in paris she was kind of longing for greater outdoor times with wild places, when perma meant ... anytime from now we can go to my place in the sub tropical area she had built her permahut with garden mmmh, ascende optimistically sounded, i could find someone to look after the hydroponics aeroponics and all the other alive things herewith only taking with the petri dishes what we could culture further at your place perma... or we too leave them here someone from our supporters experimenting with them eventually... ascende was interested too getting away from petri dish cages and bioreactors, all kind of encaging plants felt kind of less than ideal shim having read about the gardens of permaculturists what after several decades of tuning working the garden had found a self sustaining cultivated wild cycle with the only thing left to do for the human host or guest or patient... the receiving party... only thing left to do being to harvest the fruits when ripe of course he wanted to continue with the research in the laboratory to create all the most marvellous semi-artificial or let us say manipulated cell tissue to cloth the androids in but there would be others being so happy for three months staying and researching at his place, eventually they too would go the bio cell fusion way enhancing themselves or they would stay more focussed on the advancements in the petri dishes, bringing in live cell printers and so on yes, perma agreed, it might actually be for the best for the research phase before the crowdfunding to get a couple of other dedicated enthusiasts in the team and we two can follow our dream of on and in and in between sensual bodies growing.... touching lustfully each others already cellfused skins, getting into near encounters with wild animals and plants

6-they chatted a while at the water place

they chatted awhile like this at the waterplace when perma said,mmmh, although i feel we should give others a chance to experiment here in your appartement, we can still from time to time contribute some photos text and videos from our tropical placewith ascende saying... i noticed you said our hut meaning your permaplace and your appartement meaning here, shows me something on my still patriarchic behaviour in our enterpriseoh that is okay, i do not care exactly who thinks what would belong to him or her , perma answered ascendes reflectionbut yes, that is a good place to research the psychic constellation of the participants regarding who will be able to call this or that success in biological cell manipulation evolvementthis or her propertyfrankly, ascende said, i think we shall open source all of it, everyone welcome to use our stuff how it fits themperma... we just hope that they will use it in a benwvolent avenue what would help humanity to work less and enjoy playing moreascende... i think the key element of our findings are we ourselves, like our skin we are wearing right now... we could try to explain about the gentleness involved when cell samples being collectedperma.... and highlight the fusioning approach without any other heat than the ones from our bodies, there was no cutting and pasting involved no dna extraction processes, just our love towards the living cells in the petri dishes ascende... us wishing for them to grow together and become a higher class then when singleperma... i do not know if it is higher but the capability of our skins now are broader and deeper filled with knowledgethey sat silent after that for about half an hourwhen they lay down together holding each other softlyabout 5 hours later they woke up enjoyed some of the aeroponic and hydroponicly grown strawberries with a juice of fresh spirulina microalgae water from the bioreactorthey wandered around in the appartement spoke with the plants lauded them how well they have develloped and gave thanks for their contributions them serving the humans in this less then ideal conditionsperma felt well what was missing, the greater connecting wind what brought informations from far away placesthe air in paris was better these days in 2020 when most of the cars were electric populsed and much of the producing workshops used hydrogen fuell cellsbut there was a kind of dividing effect going on with the air flowing in and out of millions of housesloosing on the way its wild informations and instead being informed with the doings of humansascende looked at it same but differenthe loved the wild but still thought that it is well for the people living in the city to eat food grown near to themperma too was understanding how this planet can host as many billion human beings as it eventually would need for this race to finally understand that they us do not own this placebecause the more humans get born the more important will it be to use the space allready concreted made into roads etc in the most efficient wayso they were thinking to themselves wandering around in the appartementgetting ready for today 10 o clock when they would set the cameras in their living places on.... like ... their bed, their bathroom....so they both stayed naked at tenascende laid on the balcony enjoying the early sun and perma standing at an empty wallwhere they extra put a camera upshe started to talk about how they have met in the net she getting presented with the chameleon cells and her still wondering how ascende got his plant life cell samplesat this moment the people watching the appartement as part of their daily holydays like sightings of plants and cell evolutions in the petri dishes they all were equipped with cameras ... the people started to realize what happened with her talking of chamaeleon cells and slowly dressing herself with her skin becoming pinkish with each piece of clothes she put on at first they were writing cheering texts in the chat when after perma reacted to them thankingfor the

cheers and enthusiastic feedbacks some of the more serious into cell research were asking questions like... how the heavens did you apply the chameleon intelligence to your skin...perma explained then how they both bathed with some tiny bits of successfully lab petri dish fused interspecies cells ascende too ? someone asked with another person did remark that is why he is laying there naked on his back on the balcony ... to soak up the sun with his photosynthetic enabled new skin perma was reading the text out loud to ascende adding, that might be your moment now to announce...no , do not spill it my dear companion ... ascende laughingly cried out, jumping up on the balcony to address the audience at this point the reader would eventually be delighted to hear the unveiling of the story how he got his plant live cells but the author here has just not figured it out yet ... or...have i forgotten it, was i no writing something of a plant part being trampled off by animals... yes ... but it is not as gentle as the meditation experience what brought live chameleon skin cells to perma so... that is what ascende said now....i am so sorry but i can not tell you such a mild tale like perma ... my one involves just walking around in the nature the wetlands and forests botanical gardens and parks of paris looking for plant parts what just most recently have been separated from their plants.... and one of the perhaps 10 samples made it to fusion with my donated cells perma coming out onto the balcony and joining ascende looking in the camera she said, here we probably have not too much of a reflective method, like ... we did watch the cells fusing into each other but did not make notes...when ascende was reading on his smartphone screen incoming messages like.... never mind, just tell us at what date and time you have taken samples of what petri dishes and we eventually see on the microscopic camera recordings what happened there between human and animal or human and plant cells ascende now being relieved.... i am so happy about that approach, thank you for taking up the more logical side of research.... that is where i actually would like to announce perma and me taking some field trip time into the wild perma supportingly... like we will stay around three months and for this time there is a free space here for some adventuring cell biology researchers....when the texts coming in were already having three people wanting to be there...

explanatory ... why this line of writing and are there others

hi there

i am so happy you are donating your attention towards the thoughts what i was being happily entertaining in my head ... probably ... smile ...

what i wanted to tell you here in this explanatory ... there is more of ascende texts with them having a somewhat wide range of styles and topics

the first text i wrote in december 2007

<https://archive.org/details/ascende>

on top of that first i wrote and spoke into audiochapters some more materialswith some experimental animations and collages

the **second line of writing** started in september 2013 but most of it happened this summer 2014 at the wild river sense and on the bicycling to and from there

<https://archive.org/details/UtopiAnimalohumanPlantorgasmoMetamOrph14texts>

with the third line of ascende texts having started in september/october 2014 ... existing of this four texts compiled here

as a possible overtone ... i am trying to feel into potential possible probable futures where i personally would like to live in ... utopias, fantasies, wishitcametrue

makes me most happy when i manage to bring some into writing form ... or also drawings

there is a facebook theme site i made to announce the newest chapters, episodes

<https://www.facebook.com/ascendewithmarythelifeship>

7-sharing frenzy

so this was done then the two thought at the time when the first three interested announced themselves ascende said... hey folks , that is amazing perma reaffirming, ya we are so ready to leave into the wild, thank you for continuing here the experiments ascende... you probably will invent new ways too to advance cell evolutions now the three were asking all kind of questions like ... when can we come ... with ascende saying as soon as you can, i can barely wait to feel subtropic sun on my body, it will be like having dessert to every meal perma said , do not worry about the money, we have a steady inflow of donations now as for the research part of the android crowdfunding 5 year project the three, nilani, mandu and luoma were living allready together in sao paulo in a sharing loving way so they were allready at a heightened group understanding since about two weeks they were donating some hundreds toward ascende and perma movie live streaming from their appartement they were themselves owner of a house in sao paulo and had good friends what would look after it eventually thez could install some petri dishes cameras and fellow cell evolution searchers there wonderfull idea, ascende commented on their introduction i bought this flat for a million with 2 millions i got donated from an admirer of my art as of today i donate this flat onto the group effort with us being 5 now who have an equal share on both the flat as well as with all what is in it perma agreed and added, all our findings go to the public domain anyway, and shall be used for the good of this planet... but there is all the installations in here what ascende probably spent another 200 thousand for ascende ... and i have an account with around 300 thousands on what is solely dedicated to pay fees the city asks like property tax, water, electricity etc.... nilani ... oh i do think we will buy some solar panels with our own money when we move in luoma... and this water recycling system of yours looks quite sophisticated from what i see from the cameras you set online this morning, i have some ideas how i could enhance on it mandu... but yes, i understand your bold investment into the android project, it will greatly bring firmness into the projects perception perma... you ascende saying that all who live in an appartement or house connected to the cell evolution research for android for all crowdfunding ... all involved persons will have an equal property share on all the material belongings to the project ascende... yes, like, we two agree that we want to share it with nilani, mundu and luoma, if they for example donate their house to the pool too and have friends who want to do similar research at the sao paulo house too, we five would have to agree on accepting the new ones perma... i like this, i will also chip in with the perma place i built myself on the canary islands i bought that for 30 thousands what i got donated from my parents for my 21 birthday mundu... what you say nilani and luoma, shall we make the commitment too ? nilani... how trustfull of ascende to know us with videochat some hours and share his one million appartement property with us perma... we both did share it with you three as ascende has donated me half of his before and i have shared mine with him completly ascende... yes, i probably forgot to tell you, kind of probably patriarchic crum in my brain thinking of my one million investment against your 30 thousand, stupid, i am sorry perma... not that problematic, please do not worry about it, i believe you are growing strong on the gender neutral avenue luoma... i want to give my third of our house nilani... me too mundu... so it shall be fantastic, perma said, look at us ...5 people having three places and sharing it completly luoma... as i look at it, there is now space for 12 people, making 7 places free now ascende... i believe more... with here well 7 people to the max mundu ...and at our place max 5 as the house is about 200 m2.... perma....with at the permahut probably four to five depending on how near to each other we can live on 30square meters ----- continuing text 7 on a piece of paper with pen ---- nilani... and you know what ? as

my very personal contribution i will donate myself a shorter name... nila ... i am mundu... well well that is a line of thinking ... luoma... nila... lovely nila... thank you, i was considering to change my name for a while now and it feels very good to do it now when we are in this sharing frenzy ascende laughing... frenzy as when one is excited about tasty food and gobbels it all down as it were the first and last meal one would have ? that how you mean ? nila... exactly... but i think it is a whollistic frenzy, sustainable and... by the good spirit...the world can certainly digest some sharing frenzy as with our history the last several thousands of years of stealing of each other or excluding a part of the population from the collectively amassed wealth

Publication Date: October 31st 2014
